

Firm Profile

Floor Associates is an award winning and internationally recognized Landscape Architecture and Urban Planning firm based in Phoenix, Arizona. With projects ranging from highly technical mixed-use commercial developments and master planned communities, to community parks, interpretive spaces and healing gardens, the firm is known for creating memorable outdoor environments that heal, inspire, educate and connect. Awarded for its innovation and attention to design detail, Floor Associates is sought out for its pioneering work in sustainable arid region landscape methodologies, and expertise in over-structure and green roof designs.

Kristina Floor, FASLA and Chris Brown, FASLA have over 60 years of combined experience, and are recognized leaders in the industry. With a firm belief that the designer's impact goes beyond the drawing board and the building site, Floor Associates is committed to engagement within the broader public arena. The studio gives voice to young talent, nurturing the next generation of designers through relationships with ASU's School of Design as well as other institutions, and is an active member of several industry and affiliate organizations, both locally as well as nationally.
